Mineral Processing

(Including Mineral Dressing,
Experiments and Numericals)

Vandana Rao

Associate Professor
Metallurgical & Materials Engg. Dept.
M.S. University of Baroda
Vadodara (Gujarat)

Sonam Patel

Lecturer
Metallurgy Department
Dr. S. & S.S. Ghandhy College of
Engineering & Technology
Surat (Gujarat)

Avinash Lele

Visiting Faculty
Metallurgical & Materials Engg. Dept.
M.S. University of Baroda
Vadodara (Gujarat)

PART-I Mineral Processing Life Cycle of Ore/Mineral/Metal/Alloy

1. Introduction.....	3
1.1 Sources of Metals	3
1.2 Mining	4
1.3 Ores, Minerals and Metals	5
1.4 Ore Mineral Processing/Dressing	8
1.5 Scope of Mineral Processing in Extractive Metallurgy	8
1.6 Mineral Processing Operations	10
1.7 Mineralogy	12
1.8 Mineral Wealth of India	13
2. Properties of Minerals for Processing.....	26
2.1 Sampling	26
2.2 Physical and Chemical Characteristics of Minerals	28
2.3 Characteristics of Industrial Minerals	37
2.4 Economics of Mineral Processing	46
3. Comminution.....	48
3.1 Rittinger's Law (1867)	49
3.2 Kick's Law (1885)	50
3.3 Walka, Mc Adans and Gilliland (1937)	51
3.4 Bond's Theory	51
3.5 Classification of Basic Reduction Processes	53
3.6 Physical Aspects of Comminution	53

4. Crushing.....	55
4.1 Classification of Crushers	56
4.2 Primary Crushers	56
4.3 Secondary Crushers	65
4.4 Gravity Stamp Mill	70
4.5 Special Crushers	71
5. Grinding.....	74
5.1 Tumbling Mill	74
5.2 Ball Mill	76
5.3 Rod Mill	79
5.4 Comparison of Ball Mill and Rod Mill	79
5.5 Mill Lining	80
5.6 Variables in Ball Mill	81
5.7 Autogenous Grinding	88
5.8 Tube Mill	88
6. Sizing.....	90
6.1 Particle Size Measurement	90
6.2 Graphical Representation of Sizing Analysis	91
6.3 Screening Techniques	95
6.4 Industrial Screening	97
6.5 Classification Technique	101
6.6 Sizing by Measurement Under the Ore-Microscope	104
7. Classification and the Movement of Solids in Fluids.....	107
7.1 Settling of Fine Spheres (Stokes' Law)	108
7.2 Settling of Coarse Spheres (Newton-Rittinger's Law)	110
7.3 Settling of Spheres of Intermediate Size	113
7.4 Equal Settling Particles	116
7.5 Free Settling and Hindered Settling	117
7.6 Effect of Vessel Walls	118
7.7 To Calculate Free-Settling Ratio	121
7.8 To Calculate Hindered-Settling Ratio	122
7.9 Types of Classifiers	122
8. Gravity Concentration/Separation.....	126
8.1 Panning	126
8.2 Jigging	127
8.3 Tabling	132

8.4 Comparison of Jig and Table	134
8.5 Heavy-Media Separation	135
9. Flotation	139
9.1 Importance of Flotation in Ore Processing	140
9.2 Physicochemical Principles	141
9.3 Flotation Reagents	146
9.4 Variables in Flotation	150
9.5 Selective and Collective Flotation	155
10. Magnetic Separation Processes	157
10.1 Magnetic Separation	157
10.2 High-Tension Separation	168
11. Separation of Solids from Fluids	172
11.1 Thickening	172
11.2 Filtration	173
12. Typical Flowsheets of Mineral Processing	179
12.1 Flowsheet of Crushing Section	179
12.2 Flowsheet of Grinding Section	180
12.3 Beneficiation of Lead-Zinc Sulphides	182
12.4 Fluorspar Beneficiation Studies	183
12.5 Beneficiation of Magnetite	185
13. Pretreatment of Ore/Mineral/Concentrate	188
13.1 Drying (Temperature 100–150°C)	189
13.2 Calcining (Temperature 250–1000°C)	190
13.3 Roasting (Temperature 500–1100°C+)	191
13.4 Agglomeration	193
13.5 Agglomeration of Iron Ores	195
13.6 Testing of Agglomerated Materials	206
14. Chemical Method of Beneficiation	210
14.1 Hydrometallurgy	210
14.2 Leaching	211
14.3 Separation	214
14.4 Purification	214
14.5 Reduction	218

14.6 Mineral Dressing and Hydrometallurgy 218

14.7 Merits and Demerits of Hydrometallurgy 219

15. Application of Computer in Mineral Processing/Dressing 221

15.1 Philosophy of the Computer System 222

15.2 Basic Concepts of Computer Control 222

15.3 Software Computer Packets 224

15.4 Practical Results of Computer Control in Mines 226

15.5 Operations of the Computer System 226

15.6 Drawbacks of Using Computer in Mining Industries 228

PART-II Experiments and Numericals in Mineral Processing

Experiment 1 Jaw Crusher 231

Experiment 2 Roll Crusher 234

Experiment 3 Grinding I 236

Experiment 4 Grinding II 239

Experiment 5 Bond Grindability Test 241

Experiment 6 Sampling and Sieve Analysis 244

Experiment 7 Tube Classifier 247

Experiment 8 Centrifugal (or) Hydraulic Classifier 248

Experiment 9 Jigs 251

Experiment 10 Shaking Table 254

Experiment 11 Laboratory Sluice 256

Experiment 12 Cross-Belt Magnetic Separator 258

Experiment 13 Electrostatic Separation 262

Experiment 14 Contact Angle Measurement 264

Experiment 15 Froth Flotation 266

Experiment 16 Pelletization 269

Numericals 271

Appendix-I Metallic Ore Minerals 285

Appendix-II Selected Physical Properties of Metals 289

Appendix-III Minerals Used in Large Amounts 291

Appendix-IV Hardness of Minerals: Moh's Scale 294

Bibliography 296

Index 297
