ON COVER – The Guincho rock of Santa Cruz gessite (Lusitanian Basin, central Portugal) composed of Upper Jurassic coarse siliciclastic sediments infilling a submarine incision channel. See related paper by Pena dos Reis and Henriques, p. 1413, this issue of the *Bulletin*.

ARTICLES

<i>Geoheritage and advanced training for the oil industry: The Lusitanian Basin case study (Portugal)</i> Rui Pena dos Reis and Maria Helena Henriques	1413
<i>Neoproterozoic–Cambrian petroleum system evolution of the Micang Shan uplift, northern Sichuan Basin, China: Insights from pyrobitumen rhenium–osmium geochronology and apatite fission-track analysis</i> Xiang Ge, Chuanbo Shen, David Selby, Guozhi Wang, Zhao Yang, Yongjun Gong, and Suofei Xiong	1429
<i>The Three Forks plays lake depositional model: Implications for characterization and development of an unconventional carbonate play</i> Beatriz Garcia-Fresca, Daniel Pinkston, Robert G. Loucks, and Richard LeFever	1455
<i>Multiple-phase tectonic superposition and reworking in the Junggar Basin of northwestern China—Implications for deep-seated petroleum exploration</i> YanJun Wang, Dong Jia, Jianguo Pan, Dongtao Wei, Yong Tang, Guodong Wang, Cairu Wei, and Delong Ma	1489
<i>Western Caribbean intraplate deformation: Defining a continuous and active microplate boundary along the San Andres rift and Hess Escarpment fault zone, Colombian Caribbean Sea</i> Luis Carlos Carvajal-Arenas and Paul Mann	1523
<i>Organic matter, mineral composition, pore size, and gas sorption capacity of lacustrine mudstones: Implications for the shale oil and gas exploration in the Dongying depression, eastern China</i> Zhonghong Chen, Wenbo Jiang, Linye Zhang, and Ming Zha	1565
<i>Basin-scale, high-resolution three-dimensional facies modeling of tectonically confined turbidites: An example from the Firezuola system (Marnoso-arenacea Formation, northern Apennines, Italy)</i> Alessio Tagliaferri, Roberto Tinterri, Marco Pontiggia, Andrea Da Pra, Giancarlo Davoli, and Enrico Bonamini	1601
<i>Rhenium–osmium geochronology and oil–source correlation of the Duvernay petroleum system, Western Canada sedimentary basin: Implications for the application of the rhenium–osmium geochronometer to petroleum systems</i> Junjie Liu, David Selby, Mark Obermajer, and Andy Mort	1627

DISCUSSION AND REPLY

<i>A comparative study of reservoir modeling techniques and their impact on predicted performance of fluvial-dominated deltaic reservoirs: Discussion</i> Shengli Li, Ye Zhang, Y. Zee Ma, Christopher Dorion, Colin Daly, and Tuanfeng Zhang	1659
<i>A comparative study of reservoir modeling techniques and their impact on predicted performance of fluvial-dominated deltaic reservoirs: Reply</i> Peter E. K. Deveugle, Matthew D. Jackson, and Gary J. Hampson	1664

ACKNOWLEDGMENTS—

AAPG thanks the AAPG Foundation for financial support of this issue of the *Bulletin*.

The AAPG Editor thanks the following reviewers for their work on papers in this issue: Donna Anderson, Irene Arango, Claudio Bartolini, Mark Bentley, Brian Berwick, Christian Brandes, Jian Cao, Brigitte Doligez, Melanie Everett, Roberto Fainstein, Joan F. Flinch, Li Gao, Stephanie Gaswirth, R. H. Groshong, Debra Higley, Brian Kendall, Lucy (Ting-Wei) Ko, David Leary, Paul G. Lillis, Kyongwon Min, Kenneth E. Peters, Nuno Pimentel, Bradford E. Prather, Ellya Saudale, Xuan Tang, Anaela Viega, and Long Wu.
